6th of October, Giza, Egypt

RESEARCH SKILLS

- Surveys & questionnaires
- 1:1 feedback interviews
- Field visits
- Post-course surveys
- Playtesting sessions
- Usability issue spotting
- Data collection & organisation
- Finding patterns in feedback
- Turning insights into changes
- Stakeholder collaboration

TOOLS

Design & prototyping
Figma, Photoshop, Illustrator

Research & surveys
Google Forms, Google Sheets

UX docs & workshops
Miro

AI tools
Claude, ChatGPT, Gemini

LANGUAGES

Arabic — Native
English — Advanced

ACHIEVEMENTS

Winner, Global Game Jam 2023
ITI, Egypt

Google Agile Certificate
Coursera · 2023

Top 5, We Innovate Hackathon
Telecom Egypt / EG-CERT · 2023

Art & Design Summer School
Luton, UK · 2019

PROFILE

UX/UI designer and researcher with an Art & Design background and hands-on experience turning user feedback into better products. At ITI I supervised 42 game development students, ran monthly 1:1 feedback sessions and post-course surveys, and built staff and student dashboards from the questions people kept asking. My latest project, Questbook, is a gamified planner and habit app designed around behaviour-change principles. I'm looking to grow in a UX/UI or UX research role.

EXPERIENCE

Corporate Image & Graphic Designer 2026 – Present
Information Technology Institute (ITI) · Ministry of Communications & IT, Egypt (Government)

Game Art Track Supervisor & Teaching Assistant 2025 – 2026
Game Development Academy, ITI · Smart Village, Egypt

- Supervised ~42 game development students through weekly checkpoints and monthly 1:1 feedback sessions on their experience of the track.
- Ran surveys after every course and built per-instructor tracking sheets; adjusted the curriculum based on the findings.
- Joined with no handover, so asked staff and students what they searched for most and built staff and student dashboards around it. Used by ~7 staff and all students, they stopped most repeat questions and saved time.

Game Artist 2023 – 2024
Golden Eagle Game Studio · Bahrain (Full-time)

- Took part in regular team playtesting sessions to identify gameplay and usability problems, then iterated on art and UI to address them.
- Designed game UI in Figma alongside characters, environments and game assets.

2D Game Artist (Contract) 2023
ENNEA Company · France | FitNot Game Studio · Egypt

- Designed UI, backgrounds and characters for a mobile game, and child-friendly assets for educational games.

Research Team Member (Volunteer) 2019 – 2024
Lebaladna Charity Organization · Egypt

- Conducted surveys and field visits as part of the organisation's research team, gathering first-hand information in the field.

PROJECTS

Questbook · Gamified planner & habit app 2026

- Designed and prototyped a web app that turns habits, goals and journaling into quests, XP and rewards, built on the four laws of behaviour change.
- Reviewed existing productivity apps to find the gap, then iterated through a UX feedback round, fixing issues like lost momentum after missed days.

EDUCATION

Professional Diploma, Interactive Media & Game Art 2022 – 2023
Information Technology Institute (ITI) · 9 months

BA, Arts & Design — Graphics & Media 2018 – 2022
University for Modern Sciences and Arts (MSA), Egypt · BA also awarded by University of Bedfordshire, UK

- GPA 3.81/4 · Excellent with Honours (both universities)
- UX/UI projects incl. Mentle, a mental health app with a parent-guided kids therapy section
